

## Garden Design - Computer Applications & CAD

This course is available for professional designers as a CPD option. You will join the Garden Design Foundation Degree students to study advanced techniques in CAD – particularly for planting plans and advanced rendering.

Course Code: LSPZ0001

Start Date: Fri 20 September 2019

Weeks: 15

Time: 10:00 - 12:00

Fee: £550

### Overview

This module links closely to another module from the Foundation Degree, Planting – Design and Maintenance, with which it shares a garden project. Students have historically enrolled on both so that they can produce their planting plan in CAD, as well as learn fine presentation skills utilising Vectorworks, SketchUp and Photoshop.

You will need to be competent in basic IT for Garden Design and hold a qualification or relevant work experience in Garden Design.
